---

### Skills

**Languages:** JavaScript (ES5/ES6/ES7/NodeJS), HTML5, CSS3, Python, Typescript

**Frameworks:** React, Flask, Node.js

**Databases:** SQL (PostgreSQL)

**Tools/DevOps:** Git, Heroku, Firebase, Jupyter Notebook

**Certifications:** AutoCAD(2019), Photoshop(2016)

---

### Projects

#### [Poke-Shop Web Application](#)

A SHOPPING CART WEB APPLICATION UTILIZING AN API

- Designed a multi-page web application using React, Bootstrap, Flask, CSS, Firebase and PostgreSQL to utilize a PokeAPI where the user can add, or remove a Pokemon to and from their cart.
- Authenticated user Email and Password with the use of Firebase.
- Handled user information with firebase as users log in, log out, and create accounts where each individual user has their own unique shopping cart.

#### **React-project:** [Car-React-Directory Web Application](#)

- A multi-page web application that utilizes firebase, PostgreSQL, React, Typescript, and Flask to create a website where the user can add, remove and delete cars into a directory that is unique to an individual user.
  - Built Restful API routes to Add, Remove, and Delete a car model, make, year, and color to any database that is specific to a user.
  - Utilized Google's Firebase Authentication to build secure authentication routes as well as supporting Google login as well.
- 

### Experience

#### **Coding Temple:** *Software Engineer*

NOVEMBER 2021 - PRESENT

- Created database tables using postgresSQL and insomnia to test the users updates to the database.
  - Built and implemented data tables using ElephantSQL and creating functional ERD's for specific projects.
  - Developed a web application that implements Flask as both a front end and a back end.
  - Developed web applications that implements React as a front end and Flask as a back end.
  - Established great understanding of Object Oriented Programming(OOP) and implemented the concept in various projects.
  - Integrated API routes for web applications from public API's to self made databases for the purposes of the applications.
- 

### Education

**Coding Temple Bootcamp**, NOV 2021 - MAY 2022
